Education

2022–2026 **Bachelor of Computer Science and Engineering**, *Faculty of Automatic Control and Computer Science, University POLITEHNICA of Bucharest*

GPA: 9.76 / 10

Relevant Coursework: Artificial Intelligence, Parallel & Distributed Algorithms, Communication Protocols, Programming Paradigms, Object-Oriented Programming (Java), Data Structures & Algorithms (C), Operating Systems, Numerical Methods (MATLAB), Assembly Language (x86ASM)

Undergraduate Teaching Assistant — Computer Programming: Assisted in designing and grading programming assignments, and supported students in understanding key algorithmic concepts.

Experience

Sep 2022–Present **Machine Learning Engineer**, *Raiffeisen Bank*, Bucharest

- Developed and deployed a **nationwide ML forecasting platform** for predicting ATM cash depletion using TensorFlow and Prophet, saving over **\$400,000 annually**.
- Automated the data pipeline using **Apache Airflow**, **Docker**, **GitHub Actions** for continuous delivery and retraining workflows.
- Built **multi-agent AI systems** for financial analysis, automated contract generation, and data privacy compliance using **OpenAI Agents SDK** and **FastAPI**.

Projects

Reinforcement Learning for Chrome Dino Game, *Python*

- Designed a custom **Gym-compatible environment** for reinforcement learning experiments.
- Implemented game state tracking via `mss`, `pydirectinput`, and `pytesseract`, training an agent with `Stable Baselines3` (DQN).

Multi-Class Image Classification, *Python*

- Trained CNN and SVM models on 14K images for 6-class classification using **TensorFlow**, **Scikit-learn**, and **Transfer Learning**.
- Applied PCA for visualization and dimensionality reduction.

SmartHack — 1st Place (Hackathon Winner)

- Built a sustainability and creditworthiness assessment platform using **OpenAI APIs**, **Veridion datasets**, and **Google Air Quality API**.
- Designed a scoring model integrating environmental and financial indicators.

Awards & Competitions

- National Olympiad in Informatics (NOI) — Bronze Medal & Third Prize
- National Olympiad in Mathematics (NOM) — Bronze Medal & Honorable Mention
- “Traian Lalescu” National Mathematics Contest — Honorable Mention
- Purple Comet! Math Meet — 1st Place Romania, 9th Worldwide

Technical Skills

• **Languages & Tools:** C, Python, Java, C++, SQL, Bash, MATLAB, Vue.js, Git, Docker, Kubernetes, x86 ASM

• **Frameworks & Libraries:** TensorFlow, PyTorch, Scikit-Learn, FastAPI, Apache Airflow, LangChain

• **AI & ML Tools:** Machine Learning, Deep Learning, AI Agents, MCP, Transformers
