About me

Second year student at the Faculty of Automatic Control and Computer Science, I am passionate about programming and automatic control and eager to learn and grow. I am seeking an internship opportunity to gain practical experience and apply my skills in a professional environment.

Education

Bachelor's Degree in Automation and Computers-Systems Engineering

2024 – 2028

Faculty of Automatic Control and Computer Science, University Politehnica of Bucharest

Relevant Coursework

- Computers Programming
- Object Oriented Programming
- Signals and Systems
- Computer-Aided Graphics
- Linear Electronic Circuits
- Electrotechnics

Projects

Traffic Light

- Built a fully functional traffic light using an **Arduino** microcontroller for control and automation
- Implemented core components including **LED diodes, a resistor, a buzzer and a push button** to replicate real-world traffic signaling logic and safety sequences
- Programmed Arduino to handle timing cycles for **red, yellow and green lights**, incorporating user interaction for enhanced simulation and gained **practical experience** in integrating electronic circuits

Marketplace Fraud Detection

- Developed a system to identify suspicious transactions in market data using **Machine Learning** techniques
- Explored **data preprocessing, feature engineering, and implemented supervised learning algorithms** to classify fraud-related activity
- Used **Python and advanced data visualization tools** to analyze large datasets, interpret detection accuracy and present results effectively
- Enhanced skills in **real-world machine learning processes**, problem-solving, and **teamwork** within a professional learning environment by collaborating with a mentor

Extracurricular

Logistics Department Member

2025

"LSAC" - Automatic Control and Computer Science Students' League

- Volunteered consistently in organizing events and technical competitions such as **HackITAll, Perpetuum**, collaborating with teams to ensure a good event coordination
- Managed operational logistics including **planning schedules, handling resources and communicating to participants** to deliver successful projects

Technical Skills

Programming Languages: C, C++, Linux, Python, HTML, CSS, Javascript

Linear Electronics: Operational Amplifiers and their applications, Voltage and current amplification, Understanding of diodes characteristics and their applications in analog and digital circuits

Languages: English (Fluent), Romanian (Native)

Additional Courses

Oracle Academy - Database Design and Programming with SQL (Highschool 12th Grade)

- Completed a comprehensive course covering the fundamentals of database design, relational models, normalization

Oracle Academy – Java Fundamentals (High School, 12th Grade)

- Studied core Java programming concepts

ECDL/ICDL – European/International Computer License (High School, 12th Grade)

- Successfully completed certification modules covering: Word Processing (Microsoft Word), Spreadsheets (Microsoft Excel), Database (Microsoft Access), Presentations (Microsoft PowerPoint), IT Security and Online Essentials
