EDUCATION

Bachelor of Computer Science and Engineering, University Politehnica of Bucharest Oct 2022 - Jul 2026
Relevant Coursework: Distributed Algorithms, OOP, Data Structures and Algorithms, Operating Systems

Computer Science Department - Erasmus Exchange, University of Turin Feb 2024 - Jul 2024
Relevant Coursework: Computer Networks, Artificial Intelligence, Numerical Methods, Databases, Italian

EXPERIENCE

Amazon Jul 2025 - Oct 2025
Software Development Engineer Intern *Iasi, Romania*

- Developed a serverless testing automation system using AWS Lambda, Step Functions, and CloudFormation to simulate real user traffic, uncovering an unhandled edge case in production and reducing deployment risk
- Engineered AWS infrastructure including SQS queues, DynamoDB tables, and Secrets Manager, integrating CloudWatch alarms with custom metrics to ensure reliability and proactive monitoring
- Built enterprise-grade CI/CD pipelines with AWS CDK and TypeScript, automating deployment workflows and improving release efficiency for cloud applications

Private Programming Tutor Oct 2022 - Present
Bucharest, Romania

- Mentored over 10 students for the Romanian National Baccalaureate and university admission exams
- Designed lessons on C++ programming, algorithmic thinking and problem-solving techniques
- Achieved outstanding results with students, earning top grades in both national exams and university admissions

PROJECTS

Loper: Local Helper Platform Java

- Developed a mobile application connecting travel enthusiasts, facilitating local experiences and recommendations
- Applied Object-Oriented Programming concepts in Java, with Android SDK and Firebase for back-end services
- Awarded "Jury's Favourite" at the ING Hubs - PepinTEEN competition for innovation and user engagement

AI Pathfinding in Sokoban Python

- Designed and implemented LRTA* and Simulated Annealing algorithms to solve the Sokoban puzzle, optimizing pathfinding performance and reducing solution steps by up to 50% on multi-box levels
- Developed heuristics such as greedy box-target pairing and deadlock detection, cutting unnecessary pull moves to zero in multiple test cases and significantly improving solution efficiency

Internet Movie Database Java

- Created an online database providing comprehensive information about movies and actors, incorporating a wide range of functionalities such as role-based user accounts with personalized features and review mechanisms
- Implemented using Object-Oriented Programming principles and design patterns to ensure code maintainability
- Integrated a graphical user interface with Java Swing to provide an interactive experience for users

SKILLS

Programming Languages	Medium knowledge: Java, C, C++ Basic knowledge: Python, TypeScript, SQL, Assembly
Technologies & Tools	AWS, CI/CD, Linux, Git, Bash
Languages	Romanian [Native], English [Cambridge Certificate, C1], Italian [B1]
